

Pham Huynh Quoc Thang

Ho Chi Minh • quocthang2603@gmail.com • 0773840946

Frontend Developer with 3+ years of experience engineering high-performance web applications using modern React, Next.js, and TypeScript ecosystems. Adept at architecting scalable UI components, optimizing application performance, and leveraging cutting-edge AI workflows for rapid, reliable production delivery.

EDUCATION

University	Oct 2020 - Dec 2024
FPT University - Software Engineering	

SKILLS

Tech Stack: TypeScript, React, Next.js (SSR/SSG), Monorepo (Turborepo), React Query, Zustand, TailwindCSS, Shadcn/UI, Vitest, Playwright.

WORK EXPERIENCE

Front-End Developer	Feb 2026 - Present
HO PHI LONG CO., LTD	
HCMC, VietNam	
<u>TravelEasy – B2B2C Travel Booking Platform</u>	
Live OTA platform processing 100+ monthly bookings across flights, travel eSIM, hotels, and tours — direct and partner channels. Accelerated delivery with AI-assisted development (Cursor, Claude).	
Responsibilities & Achievements	
- Architected and optimized the core flight booking funnel (search → passenger details → checkout) on a live revenue platform, handling real-time fare updates, promotion/voucher logic, session recovery, and payment retry for incomplete orders. - Engineered a multi-partner white-label architecture enabling custom branding, dynamic layouts, and localized payment options for major partners (MWG, Techhaus, and others) from a single unified codebase — reducing per-partner delivery overhead. - Implemented Skyscanner metasearch integration, building front-end deeplink and data-mapping flows so comparison-site users enter checkout directly without redundant search — preserving session and conversion from external acquisition channels. - Expanded the product ecosystem by owning end-to-end UI and core flows for travel eSIM, hotel, and tour verticals (search → detail → order). - Leveraged AI-assisted development tools (Cursor, Claude) to accelerate delivery — faster prototyping of complex booking flows, refactoring pricing logic, and validating edge cases — while maintaining code quality through review and testing.	
Front-End Developer	Jan 2025 - Jan 2026
Arobid	
HCMC, VietNam	
<u>TRADEXPO – Virtual Exhibition Platform</u>	
Virtual exhibition and B2B networking platform integrating live streaming, and real-time interactions, serving thousands of concurrent users.	
Responsibilities & Achievements	
- Owned UI architecture across a 15+ app monorepo using Turborepo & PNPM. - Built 490+ reusable React components, improving code reuse rate to 70% across projects. - Implemented Business Matching System: real-time slot booking, availability sync, scheduling calendar. - Integrated Zoom SDK & WebSocket events for live sessions and real-time updates. - Improved SSR & SSG performance → 40% faster initial load, Lighthouse 90+ score. - Established automated QA stack: Vitest, Playwright, visual regression pipeline. - Delivered full i18n with 11 languages, responsive design for all breakpoints. - Optimized bundle size & runtime using code splitting, lazy loading & image optimization.	
Front-end Developer	May 2024 - Dec 2024
Amazing Tech	
HCMC, VietNam	
<u>AgroConnect – IoT Smart Farm</u>	
An all-in-one digital ecosystem designed to eliminate middleman costs by connecting local farmers directly to end-consumers, featuring integrated smart farming tools.	
Key Achievements	
- Built modules for agriculture-focused e-commerce and farm management system. - Developed a B2C marketplace with IoT integration, featuring real-time livestock tracking via WebSockets and Chart.js. - Developed shopping cart, checkout, order management, multi-payment integration. - Improved UI/UX performance using advanced React Hooks and TailwindCSS. - Built user profile, address management, and authentication workflows.	
Front-End Developer	Jan 2023 - Feb 2024
FPT Software	
HCMC, VietNam	
<u>Enterprise Resource Planning (ERP)</u>	
Internal Corporate Management Platform A high-security, scalable platform designed to streamline internal business processes and data management	
Key Achievements	
- Collaborated with cross-functional teams to develop and maintain enterprise-level web applications. - Implemented secure JWT authentication with profile session handling and role-based access control (RBAC).	

- Developed highly responsive UI/UX for multiple device types, ensuring cross-browser compatibility.
- Optimized page load speed significantly by implementing code splitting, lazy loading, and caching strategies.
- Managed complex application state using Redux and Context API, reducing state-related bugs by 30%.
- Participated in code reviews and mentored junior members on React best practices.
